**NIGERIAN BULK ELECTRICITY TRADING PLC  
ANNUAL REPORT AND FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2016**

**REPORT OF THE DIRECTORS**

The directors submit their report with the audited financial statements for the year ended 31 December 2016, which disclose the state of affairs of the company.

**Incorporation**

The Company was incorporated in Nigeria as a public limited liability company on 29 July 2010 under the Companies and Allied Matters Act (CAMA) CAP C20 Laws of the Federation of Nigeria 2004. The Company was issued a trading license by the Nigerian Electricity Regulatory Commission on 15 November 2011 for the purchase of electric power from generation companies and resale to distribution companies and eligible customers in line with Electric Power Sector Reform Act (EPSRA) of 2005. The Company implements its mandate as laid down in its Memorandum of Association.

**Principal activities**

The principal activities of the Company are:

- a) To undertake the business of trading in the wholesale electricity market as bulk purchaser and bulk seller of electricity and ancillary services pursuant to the Electric Power Sector Reform Act 2005
- b)
  - i. To take over the contract management and obligations of the Federal Government of Nigeria under existing Power Purchase Agreements.
  - ii. To assume active obligations in the gas sector pursuant to its designated role as the Federal Government of Nigeria's anchor for gas supply guarantees.
- c) To do all such other things as are incidental or may be thought conducive to the attainment of the above objects or any of them.

**Results for the year**

The following is the summary of the company's operating results:

	<b>2016</b>	<b>2015</b>
	<b>N'000</b>	<b>N'000</b>
Revenue	<u>439,736,876</u>	<u>260,615,491</u>
Operating (loss)	<u>(11,791,958)</u>	<u>(2,167,403)</u>
Net finance income / (cost)	<u>10,436,624</u>	<u>(2,118,582)</u>
<b>Loss for the year</b>	<b><u>(1,355,334)</u></b>	<b><u>(4,285,985)</u></b>

**Shareholding**

As at 31 December 2016, shareholding of the company was as follows:

	<b>Shareholding</b>	<b>Percentage</b>
	<b>('000 Units)</b>	<b>Holding (%)</b>
Bureau of Public Enterprises	16,000	80
Ministry of Finance Incorporated	4,000	20
<b>Total</b>	<b>20,000</b>	<b>100</b>

The Company's authorized number of ordinary shares is 20,000,000 units with a par value of 50 kobo per unit of share

**Directors**

The names of the present directors and those that served during the year 2016 are listed on page 2. None of the directors have direct or indirect interests in the issued share capital of the company.

**NIGERIAN BULK ELECTRICITY TRADING PLC  
ANNUAL REPORT AND FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2016**

**Directors' interests in contracts**

None of the directors has notified the company for the purpose of section 277 of Companies and Allied Matters Act (CAMA), CAP C20 Laws of the Federation of Nigeria (LFN) 2004, of any direct or indirect interests in contracts or proposal contracts with the company during the year. The company has a process in place to identify situations where directors may be involved in contracts; this is closely monitored and evaluated.

**Employment and employees**

The Company gives full consideration to applications for employment from disabled persons where a handicapped or disabled person can adequately fulfil the requirements of the job. Where existing employees become disabled, it is the company's policy wherever practicable to provide continuing employment under normal terms and conditions and to provide training and career development and promotion to disabled employees wherever appropriate.

**Health and safety**

Health and safety regulations are in force within the company's premises and employees are aware of existing regulations.

**Employee training and involvement**

The Company is committed to keeping employees fully informed as far as possible regarding the company's performance and progress and seeking their views wherever practicable on matters, which particularly affect them as employees. Training is carried out at various levels through both in-house and external courses. Management, professional and technical expertise are the company's major assets, and investment in developing such skills continues.

**Donations and gifts**

The company made no material contributions to charities during the year.

**Auditors**

The firm of Messrs Aminu Ibrahim & Co continued as external auditor in accordance with Section 357 (2) of the Companies and Allied Matters Act CAP C20 Laws of the Federation of Nigeria 2004, and have expressed their willingness to continue in office as external auditors of the Company.

**By Order of the Board**

**Peter Baginwa Ogbobine**  
Company Secretary  
FRCN/2021/002/00000023491  
Abuja, Nigeria.

Date 4 March 2021.

**NIGERIAN BULK ELECTRICITY TRADING PLC  
ANNUAL REPORT AND FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2016**

**STATEMENT OF DIRECTORS' RESPONSIBILITIES**

The Companies and Allied Matters Act, Laws of the Federation of Nigeria 2004, requires the directors to prepare financial statement for each financial year that give a true and fair view of the state of financial affairs of the company at the end of the year and of its profit or loss. The responsibilities include ensuring that the company:

- a) Keeps proper accounting records that disclose, with reasonable accuracy, the financial position of the company and comply with the requirements of the Companies and Allied Matters Act; CAP C20 Laws of the Federation of Nigeria 2004 and the Financial Reporting Council of Nigeria Act No. 6, 2011;
- b) Establishes adequate internal controls to safeguard its assets and to prevent and detect fraud and other irregularities; and
- c) Prepares its financial statements using suitable accounting policies supported by reasonable and prudent judgements estimates, and are consistently applied.

The Directors accept responsibility for the financial statement, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgements and estimates, in conformity with the International Financial Reporting Standard (IFRS) and the requirements of the Companies and Allied Matters Act (CAMA), CAP C20 Laws of the Federation of Nigeria 2004 and the Financial Reporting Council of Nigeria Act No. 6 of 2011.

The Directors are of the opinion that the financial statements give a true and fair view of the state of the financial affairs of the company and of its loss for the year. The Directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of financial statements, as well as adequate systems of internal financial control.

Nothing has come to the attention of the Directors to indicate that the company will not remain a going concern for at least twelve months from the date of this statement

Dated 4th March 2021.

## **REPORT OF THE INDEPENDENT AUDITORS TO THE MEMBERS OF NIGERIAN BULK ELECTRICITY TRADING PLC**

### **Our opinion**

In our opinion, the financial statements give a true and fair view of the financial position of **Nigerian Bulk Electricity Trading Plc**, as at 31 December 2016, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards, the Companies and Allied Matters Act, CAP C20) LFN 2004, and the financial policy of the Company.

### **What we audited**

We have audited the accompanying financial statements of Nigerian Bulk Electricity Trading Plc, which comprise the statement of financial position as at 31 December 2016, and the statement of total comprehensive income, statement of changes in equity, and statement of cash flows for the year ended, and notes to the financial statements, including a summary of significant accounting policies.

### **Basis of opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with Code of Ethics for Professional Accountants issued by the Institute of Chartered Accountants of Nigeria, and we have fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Emphasis of Matter – Funding shortfall**

Having reviewed events after reporting date up to 31 January 2021, we draw attention to the current liquidity situation of the company which has resulted in a significant shortfall in funding required in the Nigerian Electricity Supply Industry (NESI).

As described in Note 34.3 to the financial statement, the company has paid N2.22 trillion out of total invoices of N2.64 trillion received from generating companies as at 31 January 2021, while the distribution companies have only paid N819.3 billion out of total outstanding invoices of N2.64 trillion as at 31 January 2021. This situation adversely affects the liquidity required by the Company to meet its obligations.

Since commencing operations in 2011, as a wholly owned Federal Government of Nigeria (FGN) enterprise, the Company has received and continue to receive financial support from the Federal Government, including annual budgetary appropriations and other forms of financial injection, to enable the Company reduce the funding shortfall.

In 2017, the FGN approved a N701 billion Payment Assurance Loan Facility for the Company, to support it in meeting its payment obligation to generating companies and gas suppliers. After this facility was fully utilised, a further extension of N600 billion has also been made for the company in 2019.

The Company's ability to meet its obligations in the Nigerian Electricity Supply Industry is dependent on continued financial support from the Federal Government of Nigeria. Our opinion is not modified in respect of the matter emphasised.

### **Other information included in the financial statements**

The Directors are responsible for the other information. The other information comprises the report of the Directors, Corporate information, Risk Management report, Statement of Value Added, and five-year financial summary and any other reports excluding the financial statements as defined in our opinion paragraph above and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

### **Key Audit Matters**

Key audit matters are those matters that in our professional judgement were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

#### ***Transactions with International customers (N26,871,915,000)***

##### ***Why it was a key audit matter***

Nigeria has some international bilateral co-operation agreements on electrical energy delivery and sales with the Republic of Benin, Togo and Republic of Niger. Prior to the transitional electricity market, these agreements were administered on behalf of Nigeria by the Transmission Company of Nigeria (TCN) Market Operation (MO) unit. However, the Ministry of Power on 15 March 2016, clarified that the administration of these international customers should be transferred to NBET in alignment with the current configuration of the Nigerian electricity industry. However, before this can take place certain agreements and negotiations has to be made on the present agreement, and in the interim the management of TCN and NBET came up with a sharing formula to be used to split payments from the international customers since the MO issues a single invoice for both administrative charge and energy payments. Based on this, 24% of the payments received from International customers was deducted for administrative charge and the balance of 76% was passed to NBET for the payment of GENCO capacity and energy bill. However, of the total of N17.7 billion due to NBET in 2015, and N26.87 billion in 2016 based on the sharing formula, nothing was received in 2015 and only N13.83 billion was received in 2016, from the Market Operator.

##### ***How the matter was addressed in the audit***

We reviewed all the correspondences between NBET, the Ministry of Power and the Market Operator on the International customers. We reviewed the basis of the sharing formula and are satisfied of its validity. We reviewed the reconciliation between NBET and the MO, and we concurred with an impairment of the sum of N15.94 billion which was considered not recoverable as noted in Note 14 to the financial statements.

### **The Directors' responsibilities for the financial statements**

The Directors are responsible for the preparation and fair presentation of these financial statements in accordance with the International Financial Reporting Standards and for such internal control as the Directors determine are necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so. The Directors are responsible for overseeing the company's financial reporting process.

### **Auditors' responsibilities for the audit of the financial statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing (ISAs) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the

aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- ✓ Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- ✓ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- ✓ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- ✓ Conclude on the appropriateness of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion.

Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- ✓ Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

### **Report on Other Legal and Regulatory Requirements**

The Companies and Allied Matters Act require that in carrying out our audit we consider and report to you on the following matters. We confirm that:

- i) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit.
- ii) The Company has kept proper books of accounts, so far as appears from our examination of those books.
- iii) The Company's statements of financial position and comprehensive income are in agreement with the books of account.

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

**1. General information**

Nigerian Bulk Electricity Trading Plc (the Company) was incorporated in Nigeria on 29 July 2010. The Bureau of Public Enterprises (BPE) holds 80% of the ordinary shares whilst the Ministry of Finance Incorporated (MOFI) holds the remaining 20% both in trust for the Federal Government of Nigeria. The Company was granted a ten (10) years licence (15 November 2011 to 14 November 2021) by the Nigerian Electricity Regulatory Commission to deal in the bulk purchase and resale of electricity.

The Company's operations are funded through the market administration charges and budgetary appropriations received from the Federal Government of Nigeria, the ultimate controlling party. Funding for the Company's mandate as provided in the Electric Power Sector Reform Act (EPSRA) and as laid out in the Power Sector Road Map are appropriated to the Company from the Federal Government's annual budget.

Following the declaration of the Transitional Electricity Market (TEM) on 1 February 2015, via Order No.136 of 30th January 2015, by the Nigerian Electricity Regulatory Commission (NERC), the company took the responsibility in the transitional stage of the Nigerian Electricity Supply Industry (NESI) for purchasing bulk power from generation companies and Independent Power Producers (IPPs) based on Power Purchase Agreements (PPAs), and reselling the power to the distribution companies, and eligible customers according to demand, based on vesting contracts and power sale agreements entered into with distribution companies and eligible customers respectively.

The principal activities of the Company are:

- To undertake the business of trading in the wholesale electricity market as bulk purchaser and bulk seller of electricity and ancillary services pursuant to the Electric Power Sector Reform Act 2005.
- To take over the contract management and obligations of the Federal Government of Nigeria under existing Power Purchase Agreements.
- To assume active obligations in the gas sector pursuant to its designated role as the Federal Government of Nigeria's anchor for gas supply guarantees.
- To do all such other things as are incidental or may be thought conducive to the attainment of the above objects or any of them.

The Company is domiciled in Nigeria and the address of its registered office is:

442 Zambezi Street,  
Maitama, Abuja  
Nigeria

**2. Summary of significant accounting policies**

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

**2.1 Basis of preparation and adoption of IFRSs**

The financial statements of Nigerian Bulk Electricity Trading Plc have been prepared in accordance with International Financial Reporting Standards (IFRS), including International Accounting Standards and Interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC) applicable to companies reporting under IFRS. Further standards may be issued by the International Accounting Standards Board (IASB) and may be subject to the interpretations issued by the IFRIC.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company's accounting policies. Changes in assumptions may have a significant impact on the financial statements in the period the assumptions changed. Directors believe that the underlying assumptions are appropriate and that the Company's financial statements therefore present the financial position and results fairly. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 3.

The financial statements have been prepared on a historical cost basis, except for available-for-sale financial assets and

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

**2.1.1 Going concern**

The financial statements have been prepared on a going concern basis. The Directors have no doubt that the Company would remain in existence after 12 months.

**2.1.2 Changes in accounting policy and disclosures**

New standards, amendments and interpretations adopted by the Company

The following standards have been adopted by the Company for the first time for the financial year beginning on or after 1 January 2014 and have a material impact on the Company:

IFRIC 21, 'Levies', sets out the accounting for an obligation to pay a levy if that liability is within the scope of IAS 37 'Provisions'. The interpretation addresses what the obligating event is that gives rise to pay a levy and when a liability should be recognised. The Company is not currently subjected to significant levies so the impact on the Company is not material.

Other standards, amendments and interpretations which are effective for the financial year beginning on 1 January 2014 are not material to the Company.

New standards and interpretations not yet adopted

A number of new standards and amendments to standards and interpretations are effective for annual periods beginning after 1 January 2015, and have not been applied in preparing these financial statements. None of these is expected to have a significant effect on the financial statements of the Company. The standards and amendments are as follows:

- (i) IFRS 9, 'Financial instruments', addresses the classification, measurement and recognition of financial assets and financial liabilities. IFRS 9 was issued in May 2014 and will be effective 1st January 2018. It replaces the parts of IAS 39 that relates to the classification and measurement of financial instruments. IFRS 9 requires financial assets to be classified into two measurement categories: those measured at fair value and those measured at amortized cost. The determination is made at the initial recognition. The classification depends on the entity's business model for managing its financial instruments and the contractual cash flow characteristics of the instruments. IFRS 9 also replaced the incurred loss model in IAS 39 with the expected credit loss model for the impairment of financial assets measured at amortised cost. The Company is yet to assess the full impact of the standards on its financial statements.
- (ii) IFRS 15, 'Revenue from contracts with customers' deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. Revenue is recognised when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces IAS 18 'Revenue' and IAS 11 'Construction contracts' and related interpretations. The standard is effective for annual periods beginning on or after 1 January 2017 and earlier application is permitted. The Company is assessing the impact of IFRS 15.
- (iii) Amendment to IAS 36, 'Impairment of assets' to align the disclosure requirements in IAS 36 in line with IFRS 13 Fair Value Measurement disclosures, to require the disclosure of information about the recoverable amount of impaired assets if that amount is based on fair value less costs of disposal. The amendment also requires additional information about the fair value measurement when the recoverable amount of impaired assets is based on fair value less costs of disposal, consistently with the disclosure requirements for impaired assets in Nigerian GAAP.

**2.2 Foreign currency translation**

**(i) Functional and presentation currency**

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Naira which is the Company's functional currency.

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

**(ii) Transactions and balances**

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuations where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit or loss statement.

Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in profit or loss within 'finance income or cost'. All other foreign exchange gains and losses are presented in profit or loss within 'other income or expenses'.

**2.3 Property, Plant and Equipment**

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the asset.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the profit or loss statement during the financial period in which they are incurred.

The Company allocates the amount initially recognized in respect of an item of property, plant and equipment to its significant parts and depreciates separately each such part. The carrying amount of a replaced part is derecognized when replaced. Depreciation starts when the asset is available for use. Residual values, method of depreciation and useful lives of the assets are reviewed annually and adjusted if appropriate. Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within 'other (losses)/gains - net' in the profit or loss.

The major categories of property, plant and equipment are depreciated on a straight-line basis are as follows:

Asset category	Depreciation rate (%)
Furniture & fittings	20
Computer equipment	33
Office equipment	20
Motor vehicles	25

**2.4 Intangible assets**

Intangible assets are stated at the amount initially recognized, less accumulated amortization and accumulated impairment losses. Intangible assets include expenditure on licenses obtained from regulatory authorities and computer software licenses. Subsequent expenditure on software is capitalized only when it increases the future economic benefits of the related software. Software maintenance costs are recognized as expenses in the profit or loss statement as they are incurred. Amortization is recognized in the profit or loss statement on a straight-line basis over the estimated useful life of the software, from the date it is available for use. The estimated useful life of software ranges between 1-3 years while that of the operating license is for a period of 10 years. These are reassessed annually.

**2.5 Impairment of non-financial assets**

Assets that are subject to depreciation and amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount.

The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

**2.6 Financial instruments**

In accordance with IAS 39, all financial assets and liabilities must be recognised in the Company's statement of financial position and measured in accordance with their assigned categories. Acquisition or sales of financial assets, liabilities or equity instrument are recognised on the trade date - the date on which the Company commits to purchase or sell the asset.

**(i) Initial recognition and measurement**

Financial instruments carried at fair value through profit or loss are initially recognised at fair value while transaction costs, which are directly attributable to the acquisition or issue of the financial instruments, are recognised immediately through profit or loss. Financial instruments that are not carried at fair value through profit or loss are initially measured at fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial instruments.

**(ii) Subsequent measurement**

Subsequent to initial measurement, held to maturity instruments are measured either at fair value or amortized cost based on their classification.

**(iii) Classification and related measurement**

Management determines the classification of its financial instruments at initial recognition. The Company uses trade date accounting for regular way contracts when recording financial asset transactions.

**(iv) Financial assets**

The Company classifies its financial assets in terms of the following IAS 39 categories: financial assets at fair value through profit or loss; loans and receivables; held-to-maturity financial assets; and available-for-sale financial assets.

*Financial assets at fair value through profit or loss*

This category comprises two sub-categories: financial assets classified as held for trading, and financial assets designated by the Company as fair value through profit or loss upon initial recognition (the so-called "fair value option").

A financial asset is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. Derivatives are also categorized as held for trading unless they are designated and effective as hedging instruments.

Financial instruments included in this category are subsequently measured at fair value with gains and losses arising from changes in fair value recognised in profit and loss. Interest income and dividend income on financial assets held for trading are included in profit and loss respectively. At the reporting dates covered by these year end financial statements, the Company had no financial assets classified as financial assets at fair value through profit or loss.

*Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than :

- those that the Company intends to sell immediately or in the short term, which are classified as held for trading, and those that the entity upon initial recognition designates as fair value through profit or loss;
- those that the Company upon initial recognition designates as available-for-sale; or
- those for which the holder may not recover substantially all of its initial investment, for reasons other than credit deterioration.

Loans and receivables are initially recognized at fair value. Subsequently, loans and receivables are carried at amortised cost less any impairment.

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

*Held-to-maturity financial assets*

Held-to-maturity financial assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity, other than:

- those that the Company upon initial recognition designates as fair value through profit or loss;
- those that the Company upon initial recognition designates as available-for-sale; or
- those that meet the definition of loans and receivables.

These financial assets are subsequently measured at amortized cost using the effective interest rate method. Interest income is included in 'Interest income' in the profit or loss statement.

The Company's investment in held to maturity includes only Nigerian Treasury bills.

*Available-for-sale financial assets*

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified as loans and receivables, held-to-maturity financial assets or financial assets at fair value through profit or loss.

Available-for-sale financial assets are subsequently measured at fair value with fair value gains and losses recognised in other comprehensive income. Interest calculated using the effective interest method is recognised in 'Interest income', with dividend income included in 'Other income'. When available-for-sale financial assets are sold or impaired, the cumulative gain or loss recognised in a separate reserve in equity are reclassified to profit or loss.

**(v) Financial liabilities**

Financial liabilities are classified as financial liabilities at amortised cost. There are no financial liabilities in any other financial instrument category. Management determines the classification of financial liabilities at initial recognition.

*Financial liabilities at amortised cost*

These include trade payables and other payables. They are initially recognized at fair value. Subsequently, they are measured at amortised cost using the effective interest method. They are classified as current liabilities if payment is due within twelve months. Otherwise, they are presented as non-current liabilities.

**(vi) Determination of fair value**

At initial recognition, the best evidence of the fair value of a financial instrument is the transaction price (i.e. the fair value of the consideration paid or received), unless the fair value of that instrument is evidenced by comparison with other observable current market transactions of the same instrument.

Subsequent to initial recognition, for financial instruments traded in active markets, the determination of fair values of financial assets and financial liabilities is based on quoted market prices or dealer price quotations. This includes quoted debt instruments on major exchanges and broker quotes. For example, the Nigerian Stock Exchange and quotes from the FMDQ OTC PLC website.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry commission, pricing service or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. If the above criteria are not met, the market is regarded as being inactive. Indications that a market is inactive are when there is a wide bid-offer spread or significant increase in the bid-offer spread or there are few recent transactions.

For other financial instruments, fair value is determined using valuation techniques. In these techniques, fair values are estimated from observable data in respect of similar financial instruments, using models to estimate the present value of expected future cash flows or other valuation techniques, using market inputs existing at the dates of the statement of financial position. For illiquid financial instruments, the fair values are further adjusted to compensate for the credit risks attached to the issuers.

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

**(vii) De-recognition**

Financial assets and liabilities are de-recognised when the rights to receive cash flows or settle obligations have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership.

**(viii) Offsetting financial instruments**

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

**2.7 Impairment of financial assets**

*Assets carried at amortised costs*

The Company assesses at the end of each reporting period whether there is objective evidence that a financial asset is impaired. A financial asset is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset that can be reliably estimated.

Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation, and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

For loans and receivables category, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognised in the income statement. As a practical expedient, the Company may measure impairment using an impairment model that incorporates critical estimates such as the loss given default, the probability of default and the aged analysis of debtors in determining collective impairment.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the reversal of the previously recognised impairment loss is recognised in the income statement.

**2.8 Trade receivables**

Trade receivables are amounts due from customers for services rendered in the ordinary course of business. Trade and other receivables are carried at the original invoice amount, less allowances made for doubtful receivables. Where the time value of money is material, receivables are carried at amortized cost. Provision is made when there is objective evidence that the Company will be unable to recover balances in full. Balances are written off when the probability of recovery is assessed as being remote.

**2.9 Cash and cash equivalents**

In the statement of cash flows, cash and cash equivalents includes cash in hand, deposits held at call with banks and other short term investments with original maturities of three months or less, which are subject to insignificant risk of changes in their fair value, and are used in the management of the Company's short-term commitments.

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

**2.10 Share capital**

The Company has only one class of shares - ordinary shares - which are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction net of tax from the proceeds.

The Company benefits from funding (Contributions by the Federal Government of Nigeria and Power Trading Capital) to finance its activities. Funds from the government are recognized at their amount received as such contributions are not refundable. These funds are recognised and presented as equity.

**2.11 Trade and other payables**

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). Otherwise, they are presented as non-current liabilities. Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

**2.12 Employee benefits**

**(i) Wages, salaries and annual leave**

Wages, salaries, bonuses, other contributions, paid annual leave and sick leave are accrued in the period in which the associated services are rendered by employees of the Company.

**(ii) Defined contribution plan**

The Company operates a defined contribution scheme for its employees in line with the Pension Reform Act. A defined contribution plan is a pension plan under which the Company pays fixed contributions into a separate entity. The Company has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

The Company has no further payment obligations once the contributions have been paid. The Company's contributions to the defined contribution schemes are charged to the profit or loss statement in the year to which they relate.

**2.13 Provisions**

Provisions are recognised when: the Company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

**2.14 Revenue recognition**

Revenue is measured at the fair value of the consideration received. The Company recognises revenue when the amount of revenue can be reliably measured; when it is probable that future economic benefits will flow to the entity; and when risks and rewards have passed to the customer.

Due to the uncertainty surrounding the amount that may flow to the Company during the interim period of the power industry, the Company recognised revenue when actual payment has been made by the market operators.

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

**2.15 Interest Income**

Interest income is recognized using the effective interest method. When a loan and receivable is impaired, the Company reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loan and receivables is recognized using the original effective interest rate.

**2.16 Leases**

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

Leases of assets where the Company has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at the lease's commencement at the lower of the fair value of the leased asset and the present value of the minimum lease payments.

**2.17 Comparatives**

Except when a standard or an interpretation permits or requires otherwise, all amounts are reported or disclosed with comparative information. Where necessary, comparative figures are re-stated to align with current year presentation.

**3 Critical accounting estimates and judgements**

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed herein.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.

**(i) Contingent assets and contingent liabilities**

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent assets are not recognized but they are disclosed in the financial statement when they arise.

Contingent liabilities are possible obligations whose existence will be confirmed only by uncertain future events or present obligations where the transfer of economic benefit is uncertain or cannot be reliably measured. Contingent liabilities are not recognized but are disclosed unless they are remote.

**(ii) Impairment of financial assets**

The Company annually tests whether the trade receivables have suffered any impairment in accordance with the Company's credit policy. Impairment is calculated based on the best estimate of available information on the ability of debtors to pay and the estimated present value of the cash flow to be received.

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

**4 Financial risk management**

**4.1 Introduction and Overview of Company's Risk Management**

The Company's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

*Financial risk management overview*

The main risks that the Company is facing and actively monitoring and managing are the following:

- (i) the credit risk deriving from the possible default of a counterparty; and
- (ii) the liquidity risk deriving from the risk that suitable sources of funding for the Company's operations may not be available.

**(a) Credit risk**

Credit risk represents the Company's exposure to potential losses deriving from the non-performance of counterparties (Distribution Companies or DISCOs) and other debtors. Credit risk arises from cash and cash equivalents and credit exposures to outstanding receivables and committed transactions.

In accordance with the EPSR Act, the electricity industry needs to transition to a new model, where a government owned bulk buyer carries out contract management and bulk trading (on behalf of the distribution companies or DISCOs) until such time as the industry has developed the settlement, accounting, managerial and governance systems required for successful bilateral contracting.

Therefore, in order to accelerate private sector investments in power generation, an amount was set aside in an escrow account, through which the Federal Government provides credit enhancement to the bulk purchaser that will enter into Power Purchase Agreements (PPAs) with the successor generation companies and IPPs without using the Company's working capital as subsidy for shortfalls in DISCO payments.

This escrow account represents a risk guarantee to secure the Company's payment obligations to sellers for the sale of electrical capacity and electrical energy under the Power Purchase Agreements (PPAs), as proposed by the Bureau of Public Enterprises (BPE). Pursuant to its powers under Section 11 of the Privatization Act, The National Council of Privatization (NCP) at its 5th meeting for the year 2013, on 2 December 2013, approved the amount of N50 billion from the proceeds of the privatization of Egbin Power Plc., to be placed in escrow with the escrow agents, being First City Monument Bank (FCMB), United Bank for Africa (UBA) and First Bank of Nigeria Plc. (FBN) on behalf of the Company.

This amount is to be used solely for the payment to the sellers (Generation Companies or GENCOs) in the event that the DISCOs have not made payment to the Company's clearing account sufficient to pay the sellers. The Escrow account is for a 3 year period and would be terminated when all the escrow funds have been disbursed and/or at the third anniversary of the deposit of the Escrow amount, whichever is earlier. Any balance in the escrow amount as at the third anniversary of the account would be released to BPE. However, the account is renewable if there is a payment default of a seller's invoiced amount.

Below is a breakdown of the Company's financial assets that are exposed to credit risk and the maximum credit risk exposure before collateral held or other credit enhancements as at the reporting date.

**(i) Financial instruments exposed to credit risk**

	Maximum exposure	
	31-Dec 2016 N '000	31-Dec 2015 N '000
Cash and cash equivalents	71,134,434	77,021,700
Trade and other receivables	471,389,318	155,601,472
Treasury bills - held to maturity	-	7,880,432
Externally managed assets (loans & receivables and cash)	65,079,711	4,783,367
<b>Total</b>	<b>607,603,463</b>	<b>245,286,971</b>

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

These financial assets are further broken into the following:

31 December 2016	Cash & cash equivalent N'000	Trade and other receivables N'000	Treasury bills - held to maturity N'000	Externally managed assets (loans & receivables and cash) N'000	Total N'000

The Company carries out an impairment trigger assessment for its trade and other receivables at each reporting year end. The Company considers impairment triggers to be customers elapsing their credit periods and customers defaulting on a payment. At the reporting year end, the impairment test indicates that some part of the Company's trade receivable may not be collectible, thus the impairment loss provided as in above. Management is of the view that outside of this the carrying amounts of its trade and other receivables are fully recoverable.

**(ii) Credit quality of financial assets**

The credit quality of financial assets that are neither past due nor impaired can be referenced to external ratings (if available) or to historical information about the counterparty default rates.

Trade and other receivables consists of balances from Distribution companies, staff loans, cash advance and prepayments. The counterparties have no external ratings. These receivables are less than six months with no defaults in the past.

An analysis of the credit quality of financial assets that are neither past due nor impaired is presented as follows:

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

Financial assets that are neither past due nor impaired

	2016 N '000	2015 N '000
Cash and bank balances		
B+	71,134,434	73,338,552
BB-		3,683,148
Others		
Financial assets - Held to maturity		
B+	-	7,880,432
Externally managed investment		
B+	65,079,711	4,783,367
	<b>136,214,145</b>	<b>89,685,499</b>

"A" ratings indicate expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

"AA" ratings indicate reliable and stable financial institution(s) with the lowest expectation of default risks. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

"B" ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

"BB" ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial flexibility exists which supports the servicing of financial commitments.

The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. "Others" consists of cash in hand balances.

This is based on Fitch national long-term rating and foreign currency long term rating.

The maximum exposure to credit risk at the reporting date is the carrying value of each class of receivables mentioned above. No credit limits were exceeded during the reporting period, and management does not expect any losses from non-performance by these counterparties.

**(b) Liquidity risk**

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. The Company manages liquidity risk by ensuring that sufficient funds are available to meet its commitments as they fall due. The Company uses both long term and short term cash flow projections to monitor funding requirements for activities and to ensure there are sufficient cash resources to meet operational needs. Cash flow forecasting is performed by the finance department through budgeting and quarterly budget report. Cash flow projections take into consideration the Company's financing plans and source of funds. Surplus cash held by the Company over and above balance required for working capital management are transferred to the treasury department which invests in interest bearing accounts (i.e. Nigerian Treasury Bills).

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

The table below analyses the Company's financial liabilities into relevant maturity groupings based on the remaining period from the reporting dates to the contractual maturity date.

	31 December 2016 N'000			31 December 2015 N'000		
	Less than 3 months	3 months - 1 year	2 years to 5 years	Less than 3 months	3 months - 1 year	2 years to 5 years
Trade and other payables	89,376,577	378,013,609		40,960,741	124,960,105	-
Current portion of borrowings	-	-	-	-	-	-
Non-current portion of borrowings	-	-	118,401,535	-	-	76,650,353
	<b>89,376,577</b>	<b>378,013,609</b>	<b>118,401,535</b>	<b>40,960,741</b>	<b>124,960,105</b>	<b>76,650,353</b>

The amounts disclosed in the tables above are the contractual undiscounted cash flows of the liabilities.

**(c) Market risk**

Market risk is the possibility that changes in currency exchange rates, interest rates or commodity prices will adversely affect the value of the Company's financial assets, liabilities or expected future cash flows.

**(i) Foreign exchange risk**

Exchange rate risk arise from payment obligation to GENCOs denominated in US Dollars. The risk would be mitigated by payments in US Dollars from International customers.

**(ii) Interest rate risk**

The Company has no risk arising from interest rate as it currently has no long term loan or bank overdraft. It finances its activities from funds provided by the government and through its generated revenue.

**(iii) Price risk**

The Company is not exposed to securities price risk because there are no investments in equity held by the Company. The Company is not permitted to invest in equity investments.

**(d) Capital risk management**

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern in order to provide benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital.

The Company considers its capital structure to include common share capital and net working capital (defined as cash and cash equivalents, accounts receivable and other receivables and other current assets less accounts payable and accrued liabilities less other current liabilities).

The Company relies on the cash resources available from income on services provided, capital contributions and budgetary allocations by the Federal Government of Nigeria.

Capital is defined by total equity and it is monitored regularly by the Company's management. The Company is not subject to an externally imposed capital.

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

**4.2 Financial instruments by category**

The carrying values of financial assets and liabilities on the statement of financial position approximates their fair values. Trade and other receivables/payables, held to maturity and cash and cash equivalents are the Company's short term financial instruments. Accordingly, management is of the opinion that their fair values are not expected to be materially different from their carrying values.

Financial instrument classification	31 December 2016		31 December 2015	
	Carrying value N '000	Fair value N '000	Carrying value N '000	Fair value N '000

Borrowings	118,401,535	118,401,535	76,650,353	76,650,353
	<u>585,791,722</u>	<u>585,791,722</u>	<u>242,571,200</u>	<u>242,571,200</u>

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Company classifies the fair value of the financial instruments according to the following hierarchy based on the amount of observable inputs used to value the instrument. The three levels of the fair value hierarchy are as follows:

- > Level 1 - inputs to the valuation methodology are quoted prices for identical assets or liabilities in active markets.
- > Level 2 - inputs to the valuation methodology are derived from quoted prices for identical assets or liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument. Level 2 valuations are based on inputs, including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace.
- > Level 3 - inputs to the valuation methodology are not based on observable market data.

Cash and cash equivalents have been classified as Level 1. They are carried at cost, which approximates fair value due to the short-term nature of the instrument. Available for sale instruments have also been classified as Level 1 as they are carried at unadjusted market values.

Held to maturity have been classified as Level 2. They are valued using the information substantially observed or corroborated in the marketplace.

Accounts receivable and other receivables and trade payable and accrued liabilities are all short-term in nature and as such, their carrying values approximate fair values.

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

	2016 N'000	2015 N'000
<b>5 Revenue</b>		
Market proceeds (i)	278,189	334,073
Sales - bulk electricity (ii)	393,256,580	253,256,613
Interest on unpaid balance (iii)	46,202,106	7,024,804
	<u>439,736,876</u>	<u>260,615,491</u>

- (i) This relates to market revenue obtained from the Market Operator (MO) in line with the Rules for the transitional electricity market (TEM). These charges are deducted from payments made by the distribution companies and remitted monthly to the Company by the Market Operator.

	2016 N'000	2015 N'000
(ii) <i>Sales - bulk Electricity is made up of :</i>		
<i>Sales to Nigerian electricity distribution companies</i>	365,358,224	234,980,328
<i>Sales to International customers</i>	26,871,915	17,741,595
<i>Sales to GENCOs (energy import)</i>	1,026,441	534,691
	<u>393,256,580</u>	<u>253,256,613</u>

With the commencement of the Transitional Electricity Market (TEM) in February 2015, the company activated the vesting agreements it signed with the eleven Distribution Companies (DISCOs), selling electricity to them as per the tariff schedule to the vesting agreements, while existing Nigeria bilateral agreements on power supply with the International customers continued to be operated by the Market Operator - the predecessor to NBET. However on 7 September 2016, the Ministry of Power, Works and Housing clarified that the administration of sale of electrical energy to the International customers should be transferred to NBET in line with the new structure of the electricity market in Nigeria. But before this can be done, certain amendments and negotiations has to take place, meanwhile the Ministry asked the Management of TCN and NBET to agree on a sharing formula to be used to split payments from the international customers since the MO sends a single invoice to them. On 19 June 2017, the two management agreed that the average monthly administrative charges is between 22-24%, and therefore the Ministry approved that after deduction of this percentage, the balance should be paid to NBET for settling GENCO capacity and energy payments. Therefore the figure on International customers above represents 76% of the total value of invoices sent by the Market Operator to the International customers.

- (iii) As per the Supplementary Order issued by the Nigerian Electricity Regulatory Commission (NERC), Section 8a(v), financial shortfall by DISCOs shall be repayable at NIBOR plus 10%, but from August 2016 the rate was reviewed to NIBOR plus 4%. This is computed daily on the DISCOs outstanding balance after the payment due date.

	2016 N'000	2015 N'000
<b>6 Cost of sales</b>		
Purchases - bulk electricity (i)	387,842,983	256,248,679
Interest on unpaid balance	46,681,802	5,446,486
	<u>434,524,785</u>	<u>261,695,165</u>

- (i) These are capacity and delivered energy bills from power generating companies (GENCOs) under their different Power Purchase Agreements (PPAs) based on their tariff schedule.

	2016 N'000	2015 N'000
<b>7 Other income</b>		
Sundry income	9,549	10
	<u>9,549</u>	<u>10</u>

Sundry income represents interest of 4% per annum computed on the staff mortgage loan scheme.

	2016 N'000	2015 N'000
<b>8 Administrative and general expenses</b>		
Other operating expenses	364,775	436,123
Directors' emoluments and other expenses (Note 10)	-	21,131

	<u>375,175</u>	<u>467,655</u>

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

	2016 N'000	2015 N'000
<b>9 Payroll and related costs</b>		
<b>(i) Staff cost</b>		
Salaries and wages	538,993	489,382
Pension costs - defined contribution plans	22,629	21,600
	<u>561,622</u>	<u>510,982</u>

Pension was determined based on monthly contribution at the rate of 8% from Employee and 10% from Company, of the basic, housing, and transport allowance of each employee, and paid to the pension fund administrator chosen by the employee. The figure above is the company's 10% contribution.

(ii) The average number of persons employed by the Company at the end of each year was as follows:-

	Number 2016	Number 2015
Executive Management staff	5	5
Management staff	8	8
Non Management staff	32	31
	<u>45</u>	<u>44</u>

(iii) Employee remuneration bands:

Employees whose emoluments were within the following ranges in the year were:

Below N5,000,000	19	20
N5,000,001 - N10,000,000	13	11
N10,000,001 - N15,000,000	4	4
N15,000,001 - N20,000,000	4	4
Above N20,000,001	5	5
	<u>45</u>	<u>44</u>

**10 Directors' emoluments**

Remuneration paid to the Company's directors was:

	2016 N'000	2015 N'000
Fees and allowances	-	14,357
Other expenses	-	6,775
	<u>-</u>	<u>21,131</u>
Highest paid director - Managing Director	<u>48,538</u>	<u>47,225</u>

**11 Depreciation and amortisation**

Depreciation expense	124,641	104,404
Amortisation expense	9,924	4,698
	<u>134,565</u>	<u>109,102</u>

**12 Impairment charge**

	<u>15,942,235</u>	<u>-</u>
--	-------------------	----------

The Company reconciled the sales and payments received by the Market Operator from International customers between February 2015 to February 2017 on 5 May 2017. The reconciliation showed that the International customers had made some payments which the Market operator used to settle pre - Transitional Electricity Market (TEM) liabilities, hence this amount may not be recoverable, a loss event has occurred and an impairment allowance is recognised in accordance with IAS 39.

**13 Finance income**

	N'000	N'000
Bank interest income	1,601	5
Investment income on Eurobond facility (i)	4,740,919	1,771,017
Net exchange (loss) / gains (ii)	10,692,338	-
	<u>15,434,858</u>	<u>1,771,023</u>

(i) Investment income represents the income earned on externally managed assets (See Note 19).

(ii) Exchange gain arose mainly from the International customers balance

**14 Finance cost**

Other financial charges	165,504	28,261
Interest expense on Eurobond facility	4,832,730	3,776,599
Net exchange loss	-	84,744
	<u>4,998,234</u>	<u>3,889,604</u>

Interest expense represent the interest on NBET's borrowings during the year. It was computed using the effective interest rate (See Note 23).

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

**17 Trade and other receivables**

	2016 N'000	2015 N'000
Trade receivable (i)	470,243,285	155,400,844
Prepayments (ii)	546,033	66,529
Other receivable (iii)	600,000	134,099
	<u>471,389,318</u>	<u>155,601,472</u>

**(i) Trade receivable**

Trade receivable is made up of :-

International customers	40,545,925	17,741,595
Allowance for impairment	(15,942,235)	-
	<u>24,603,690</u>	<u>17,741,595</u>
Local distribution companies (DISCOs)	444,205,946	137,130,172
Local generating companies (GENCOs)	1,433,649	529,077
	<u>470,243,285</u>	<u>155,400,844</u>

Receivables due from Distribution Companies (DISCOs) are for capacity and delivered energy supplied to them under their respective vesting contracts. Interest at NIBOR plus 10% before August 2016, and NIBOR plus 4% from August 2016, are applied on outstanding balances until paid.

- (ii) On 1 July 2016 the company disbursed the first tranche of the staff mortgage loan scheme of N467,102,979 which provided an upfront advance of the equivalent of six years furniture and rent allowance to eligible staff. The loan attracts interest of 4% per annum, and repayment shall be through deduction of benefiting staff rent and furniture allowance. The balance of N457,561,591 is included in this figure.
- (iii) Other receivable represents the balance of annual contributions received from the Federal Government of Nigeria (FGN) through the Ministry of Power. NBET was unable to utilise the funds and obtained an approval from the Accountant General of the Federation for the rollover of the funds. The funds were subsequently received after the reporting date.

**18 Financial assets - held to maturity**

	2016 N'000	2015 N'000
Investment securities	-	7,880,432
		<u>7,880,432</u>

Financial assets - held to maturity represents the Company's investments in Nigerian Treasury Bills, but with the implementation of the Treasury Single Account, all the funds were transferred into the Company's TSA account with the Central Bank of Nigeria.

**19 Externally managed investment**

	2016 N'000	2015 N'000
Loans and receivables	61,898,713	4,754,907
Available for sale	45,168,152	65,449,429
Cash and cash equivalents	3,180,998	28,460
	<u>110,247,863</u>	<u>70,232,796</u>

The externally managed investment represents sum of USD\$350 million transferred to Nigeria Sovereign Investment Authority (NSIA) under an Investment Management Agreement executed in 2014. In addition to management of the fund, NSIA also acts as a custodian and consideration will be paid to NSIA after certain milestones have been met and the customer's share of returns has been paid. NSIA's objective is to outperform a benchmark return of 1.21% - a blended rate provided across four leading Nigerian banks, however these terms were renegotiated effective 1 October 2016, setting a new hurdle rate of 4% return and capping the investment management fee at \$1 million per annum.

**20 Loan redemption account**

Central Bank of Nigeria - Bond redemption account  
 This account warehouses the \$13,500,000 interest repayment on the Eurobond facility, due to the Debt Management Office (DMO).

4,110,750

**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

	2016 N'000	2015 N'000
<b>22 Trade and other payables</b>		
Trade payables (i)	465,818,579	165,464,568
Other payables and accrued expenses (ii)	1,571,607	456,279
	<u>467,390,187</u>	<u>165,920,847</u>

- (i) Trade payables represent the balance due to power generating companies (GENCOs) for energy received from them under their various Power Purchase Agreements (PPA). Interest are applied on the outstanding balances until paid in accordance with the PPAs.
- (ii) Other payables and accrued expenses are amounts due to various vendors for goods and services provided to the Company, investment management related obligations such as fund management fees, sub-managers fee and global custodian fees.

	2016 N'000	2015 N'000
<b>23 Borrowings</b>		
FGN Eurobond facility (i)	116,401,535	74,650,353
Power trading capital (ii)	2,000,000	2,000,000
	<u>118,401,535</u>	<u>76,650,353</u>

(i) *Movement in FGN Eurobond facility is as follows:*

<i>Opening loan balance</i>	74,650,353	66,631,275
<i>Revaluation</i>	41,029,202	4,242,480
<i>Interest accrued during the period</i>	4,832,730	3,776,598
<i>Interest transferred to Bond redemption account</i>	(4,110,750)	-
	<u>116,401,535</u>	<u>74,650,353</u>

In March 2014, the Federal Government of Nigeria secured a \$1 billion Eurobond facility and \$350 million was availed to NBET to boost the operations of the Company. These funds were disbursed to NBET at 5.375% on 6 June 2014 with a tenor of four and a half years, with a one year moratorium on interest payments. However at the expiration of the moratorium period, the Debt Management Office (DMO) granted the request of the company for a bullet repayment of the principal on maturity. The revaluation arose as a result of applying the closing forex rate as at 31 December 2016, to arrive at the carrying Naira value.

- (ii) In accordance with Board of Directors resolution of 17 September 2020, this would be later reclassified and treated as deposit for shares (equity).

	2016 N'000	2015 N'000
<b>24 Share capital</b>

Interest earned on investment (i)	119,568	1,623,013
Transfer to operational account for financing recurrent expenditure (ii)	-	(2,000,000)
At 31 December	<u>22,410,981</u>	<u>20,933,413</u>

Power trading capital represents funds appropriated to the Company to enable it carry out its mandate as stated in the Electric Power Sector Reform Act and as laid out in the Power Sector Road Map.

(i) To ensure adequate capitalisation for the Company's role under the Transitional Electricity Market, the Federal Ministry of Finance granted authorisation to utilise the interest earned and accruing on its investment in Treasury bills to boost the Company's capitalisation, provided that NBET does not utilise such monies for any recurrent expenditures. The approval came into effect retroactively from 1 April 2014, but in September 2015, the Company in compliance with the directive on Treasury Single Account (TSA) started moving the funds to CBN TSA.

(ii) As a result of shortfall in projected market revenue, the Board of Directors on 7 July 2014, resolved that N2b be transferred from the Company capital accounts to finance recurrent expenditure, and on 17 September 2020, the Board resolved that this be reclassified and treated as deposit for shares (equity).

	2016 N'000	2015 N'000
<b>27 BPE Escrow accounts</b>		
BPE - Egbin Escrow	50,321,608	50,321,608
BPE - Olorunsogo Escrow	1,671,975	1,670,856
BPE - Omotosho Escrow	2,014,902	2,011,595
	<u>54,008,485</u>	<u>54,004,059</u>

These are funds set aside by the Bureau of Public Enterprises (BPE) as payment guarantee for the Power Purchase Agreements (PPAs) signed with the privatised Generating Companies (GENCOs).

*Movement in BPE Escrow accounts was as follows:*

	Escrowed amount (N'000)	Interest (N'000)	Total (N'000)
BPE - Egbin Escrow (i)	50,000,000	321,608	50,321,608
BPE - Olorunsogo Escrow (ii)	1,657,927	14,048	1,671,975
BPE - Omotosho Escrow (iii)	1,991,670	23,232	2,014,902
	<u>53,649,597</u>	<u>358,888</u>	<u>54,008,485</u>

(i) At the execution of the Egbin escrow agreement in December 2013 with the escrow agents (FCMB, UBA, First Bank), the agreed interest rate was 0.02% per annum, but effective 1 July 2015 the rate was revised to 2% per annum. The fund with the escrow agents have been subsequently transferred in October 2015, into NBET CBN TSA account. In February 2016, the sum of N17.3 billion was used to settle obligations to power generating companies.

(ii) Escrowed fund of USD10,110,000 for Olorunsogo PPA converted on 1 April 2014 at the rate of N163.9/USD1. In February and June 2016, the fund was completely used to settle the GENCO's payments shortfall.

(iii) Escrowed fund of USD10,110,000 for Omotosho PPA converted on 22 April 2015 at the rate of N197/USD1. The interest rate was revised to 2% per annum effective 1 July 2015. In February and June 2016, the fund was completely used to settle the GENCO's payments shortfall.

Ministry of Power (iii)	2,308,875	1,708,875
	<u>78,728,341</u>	<u>76,646,347</u>

- (i) Transactions with the Bureau of Public Enterprises (BPE) represent the escrowed funds stated in Note 26.
- (ii) Transactions with the Ministry of Finance represent funds received in respect of the Power Trading Capital which represents cash back up in order to guarantee agreements signed by the entity with the generation companies (GENCOs) as stated in Note 25.
- (iii) Transactions with Ministry of Power represent annual budgetary receipts from the Federal Government for start up and operational activities of the Company as stated in Note 24.

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

**(b) Key management compensation**

The key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including any Director (whether executive or otherwise) of that entity. The key management personnel are the Company's Directors and management staff. Key management personnel includes staff on the senior manager cadre and above. The compensation paid or payable to key management for employee services is shown below:

	2016 N'000	2015 N'000
<b>(i) Salaries and other short-term employee benefits</b>		
Directors - Non executive	-	14,357
Management	332,892	316,183
	<u>332,892</u>	<u>330,540</u>
<b>(ii) Loans to management staff</b>		
Staff mortgage loan scheme {Note 16(ii)}	<u>339,533</u>	<u>-</u>

There was no other compensation paid during the period.

**33 Capital commitments, Contingent assets and liabilities**

**(a) Capital commitments**

There were no capital expenditures contracted for at the end of each reporting period not yet incurred.

**(b) Contingent assets**

There were no contingent assets as at the reporting date.

**(c) Contingent liabilities and commitments**

There were no contingent liabilities as at the reporting date.

**34 Events after reporting date**

34.1 Prior to the finalisation of the Payment Assurance Facility (PAF) term sheet that gave the company access to the N701 billion loan from the Central Bank of Nigeria the balance of N32.7 billion held in the Egbin escrow account was utilised in supplementing payments to power generation companies for the January 2017 and part of the February 2017 invoices. The Central Bank of Nigeria has since refunded the balance to the Company.

34.2 The Company, pursuant to its vesting contracts with various distribution companies, received nine (9) bank guarantees from 9 distribution companies worth a total sum of N56.97 billion. A deed of assignment was executed between the company and United Bank of Africa Plc to assign the bank guarantees as payment security to electricity generating companies. The Security Trustee is United Capital Trustee Limited, who is in possession of the bank guarantees via a Security Trust Deed. The Security Trust Deed was executed on 20 May 2016, the parties to the deed are NBET, United Capital Trustees Limited and respective generation companies that are the beneficiaries.

However, two ongoing court cases at the Federal High Court of Nigeria namely; (i) Benin Electricity Distribution Plc and Ibadan Electricity Distribution Plc, vs NERC and NBET; and (ii) Enugu Electricity Distribution Plc and others (Kano Electricity Distribution Plc and Jos Electricity Distribution Plc) vs. NERC, currently impede access by the generation companies to the company's payment security. This has therefore prompted the company to request that United Capital Trustees Limited freeze the annual administrative fee on the security trust deed.

Furthermore, in 2018 the remaining two (2) bank guarantees were provided by Kaduna Electricity Distribution Company and Abuja Electricity Distribution company, respectively.

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

**34.3 Transactions with generation companies and distribution companies**

Between 1 February 2015 and 31 January 2021, the Company has paid the generation companies N2.22 trillion against invoices of N2.94trillion, representing 75% of total outstanding. Total outstanding invoices due to generation companies as at 31 January 2021 is N722 billion and; between 1 February 2015 and 31 January 2021, the eleven distribution companies have paid N819.3 billion to the company from a total invoices of N2.64 trillion representing 31% payment. Total outstanding invoices is N1.82 trillion and estimated interest receivable is N849.5 billion based on interest rate of NIBOR +4%.

**34.4 Payment Assurance Facility (N701 billion)**

The Federal Executive Council (FEC) at its meeting of March 1, 2017 approved a N701 billion Payment Assurance Facility for the power sector, to be provided by the Central Bank of Nigeria (CBN). The facility is a 10 - year loan to the Company at 5% interest. This facility is meant to provide the Company the funds to assure existing generation companies of payment of up to 80% of their monthly invoices, and their Gas Suppliers up to 90% of their invoices. As at 31 December 2019, the total sum of N701 billion has been fully utilised, however an extension of N600 billion was approved to ensure that 100% payment to generation companies are made on their invoices. As at 31 December 2020, the Company had drawn the sum of N361.2 billion, leaving a balance of N238.7billion.

Interest on the CBN N701 billion loan became payable in January 2019 as the moratorium period lapsed after one year. As at 31 December 2020, an interest amount of N90.6 billion had accumulated for which NBET has paid N21.5 billion. The outstanding interest of N69.13 billion the Company intends to forward to Federal Ministry of Finance to settle.

Mainstream Energy Solutions Ltd, Transcorp Power Limited, Egbin Power Plc and North South Power Company Ltd (Plaintiffs) instituted an action against the Federal Government of Nigeria, Minister of Power Works and Housing, The Company, Central Bank of Nigeria, Azura Power West Africa Limited and Accugas Limited (Defendants) vide a write of summons dated 19 February 2018 but filed at the Federal High Court, Abuja, with suit No. FHC/ABJ/CS/180/2018, on 20 February 2018. The case was filed to stop the company from settling the invoices of the 5th and 6th defendants from the N701 billion Payment Assurance Facility created for the purpose of paying in an equitable and fair manner, 80% of all bills and invoices submitted by power generation and gas supply entities carrying out business of generating power. The injunction as requested by the plaintiffs was denied on 8 February 2019. The matter was adjourned severally for hearing of the substantive suit, however when the case eventually came up on 28 September 2020, the Plaintiff moved a motion to discontinue the suit and same was granted.

**34.5 The Company renegotiated the terms of the Investment Management Agreement on its \$350 million investment with Nigeria Investment Authority (NSIA) and set a more favourable new hurdle rate of 4% optimising its investment income and capping the investment management fee at \$1 million per annum. The agreement took effect from 1 October 2016. Furthermore, the Company entered into a USD120 million swap contract with the Central Bank of Nigeria on 1 March 2016 through the investment activities of NSIA on the proceeds of the \$350 million Eurobond availed to the company by the FGN. The swap contract expired on 30 November 2017.**

CBN's decision to devalue the Naira has had both FX gains and losses to the company's assets and liabilities. Notably affected is the company's Eurobond facility which has significantly increased in Naira value as the company's liabilities in the form of loan repayments/interests have increased.

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

**34.6 Repayment of NBET's \$350m Eurobond shareholder loan**

The \$350m Eurobond Shareholder loan availed to the Company in March 2014 fell due for repayment in June 2018. The total principal and interest due for repayment was \$428.28million. Hence the company liquidated the entire portfolio in the management of NSIA, and realised the sum of \$417.46 million. This has been paid to the Debt Management Office (DMO) leaving a shortfall of \$10.82million. Having envisaged a shortfall, the company made a provision of N2.62 billion in its 2018 budget for this purpose. As of December 2020, NBET had paid the total N3.82billion ( \$12.54 million) provided in its budget to DMO, leaving an outstanding balance of \$96,000 due to DMO. The Company has included this balance in its 2021 budget.

**34.7 Power Sector Reform Plan**

NBET has received a total of N138 billion out of N193.3 billion from the 2018 appropriation under the Power Sector Reform Plan for the power sector reform program, and also received a total of N81.1 billion from its 2020 budget appropriation under the Power Sector Reform program. The proceeds received has been used to reduce the growing outstanding balance due to GENCOs, this is reflected in the outstanding balances as at 31 January 2021.

**34.8 Other court cases**

In addition to the law suits already mentioned, as at December 2019, there were other lawsuits relating to issues in the electricity market, in which NBET has been listed amongst the Defendants:

**(i) Mr. Chinwe Henry Mbakwem vs NERC & 20 Ors. With suit No. FHC/ABJ/Cs/1128/2018**

The claimant alleged, that NBET has failed to pay sums due and owing to the Generation Companies (GenCos) promptly and as at when due, for the supply of power to the National Grid, and that NBET continues to owe, delay payments and/or underpay invoices. This, he claimed had resulted in the inability of the GENCOs to meet their operational payment obligations to various entities including gas suppliers. This breach of duty according to the claimant, has contributed to the unsteady electricity supply in the Nigerian Electricity Market. NBET has filed a motion seeking the dismissal of the case due to lack of merit.

The matter came up for mention on the 25th day of June 2019 at the Federal High Court, Lagos division. The Court could not sit at the last adjourned date of 26 November 2020 due to the Covid-19 pandemic. The matter was adjourned to 22 February 2021.

**(ii) Registered Trustees of Human Rights Foundation Vs. NBET & 24 Ors. with Suit No. FHC/L/CS/1167/2018.**

At the heart of the matter is a complaint that the implementation of the Eligible Customer initiative has reduced the quantum of electric power available for distribution to the rest of the citizens of the country. The key focus of the law suit is the power sale agreements that Mainstream Energy Solutions Limited (MESL) executed with various companies listed as 3rd to 7th Defendants. The case seeks to invalidate these contracts as being inconsistent with the Eligible Customer Regulations as well as the Electric Power Sector Reform Act 2005 (EPSRA).

The Plaintiff erroneously stated that NBET and NERC both being regulators who ought to protect the interest of electricity consumers, have done absolutely nothing to deal with the matter. Referring to NBET as a co-regulator shows that the Plaintiff does not understand the role of NBET in the electricity market. Notwithstanding the merit or otherwise of the main grouse of the Plaintiff, there is no basis for dragging NBET into the matter. Accordingly, NBET has made a case for it to be struck out from the lawsuit as the applicant does not have the locus standi to sue NBET since the applicant does not have any contractual relationship with NBET. The case was adjourned till the 7th day of October 2019, the 14<sup>th</sup> day of November, 2019 and subsequently, the 19<sup>th</sup> day of February, 2020.

**NIGERIAN BULK ELECTRICITY TRADING PLC**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE YEAR ENDED 31 DECEMBER 2016**

**(iii) Registered Trustees of African Initiative Against Abuse of Public Trust Vs. NERC & 10 Others – Suit No. FHC/ABJ/CS/1454/2019**

The Plaintiff by an originating summons complained that the EPSRA does not vest in the NERC, powers to revoke, withdraw or cancel licenses of the DisCos as stated by NERC in a "Notice of Intention to cancel License" dated 8th October, 2019. The Plaintiff also contends that, the DisCos not meeting their contractual obligations under their respective Performance Agreement and Vesting Contract, and their non-remittance of proceeds of electricity generation purchased by these DisCos from NBET, was not a valid ground for cancelling their licenses, neither does NERC have the powers to order and compel the performance of the respective contracts executed by the DisCos.

The Plaintiff further asserts, that NERC acted outside its powers by sending out their Notice of intention to cancel the licenses issued to the respective DisCos; and that NERC did so in collusion with BPE and the DisCos core investors knowing that such an unlawful and illegal exercise of powers by NERC or the Federal Government would entitle the DisCos core investors to claim pursuant to their respective Performance Agreements and Put Call Option Agreements with BPE, 100% of their investment plus 20% Return on Investment for 5 years.

The Court, in its ruling delivered on 12<sup>th</sup> December 2019 stated that parties maintain status quo pending determination of the substantive suit. The matter was adjourned to the 17<sup>th</sup> day of January, 2020.

**(iv) The Governing Council of The Industrial Training Fund Vs. Kano Electricity Distribution Company Plc. & 4 Others – Suit No. FHC/KN/CS/130/2018.**

The matter was instituted at the Federal High Court, Kano State division on the 7<sup>th</sup> day of November, 2019.

At the heart of the matter is a complaint from the Industrial Training Fund (ITF) against KEDCO over non-compliance with the law from 2013 till date. KEDCO's lack of compliance with registration with ITF despite several visits and even after engaging consultants to educate KEDCO on the need to comply with the law shows, according to ITF, that, KEDCO had intentionally failed, refused and/or neglected to be compliant. ITF also stated that KEDCO failed to remit any funds and they do not have records of staff training despite promises to do so, hence KEDCO is liable to pay the statutory penalty of 5% on a monthly basis and other sums listed in their processes.

Notwithstanding the merit or otherwise of the complaint by the Plaintiff, NBET is of the opinion that, there was no basis for joining NBET in this matter as none of the reliefs sought relates to NBET.

**(v) Enugu Electricity Distribution Company (EEDC) V. NERC, BPE & NBET – Suit No. FHC/ABJ/CS/122/2020**

By an ex parte application, EEDC complained about NERC's regulatory requirement for them to remit a stipulated minimum payment to NBET, as provided under the 2016 – 2018 Minor Review of Multi Year Tariff Order (MYTO) 2015 and Minimum Remittance Order for the Year 2019, dated 19th August 2019, with Effective Date of 1st July 2019 ("Minimum Remittance Order 2019"), and the December 2019 Minor Review and of Multi Year Tariff Order (MYTO) 2015 and Minimum Remittance Order for the Year 2020, dated 31st December 2019, with an effective date of 1st January 2020 ("Minimum Remittance Order 2020").

The court ordered that the defendants be put on notice and an order was made asking parties to maintain status quo. No date has been communicated to NBET yet, however, NERC was to procure a lawyer to defend NBET and NERC.

**(vi) Cyrex Energy Ltd & 1 Other v. FGN & 4 Ors**

The parties to the law suit are: FGN (1st Defendant), Hon. AGF (2nd Defendant), CBN (3rd Defendant), NERC (4th Defendant) and NBET (5th Defendant). The plaintiffs alleged that, the CBN NEMSF facility was established by the FGN to pay the plaintiffs and other power producers to address the payment shortfall during the interim period. After the second reconciliation, parties identified the outstanding debt to be N2,292,847,594.44 of which gas charge was N1,789,847,594.44 and payment form capacity charge was N503,259,141.36 of which the gas payment component had been disbursed to the gas supplier but the capacity charge component has not been paid till date. As at the time of filing of this suit, the plaintiffs noted that the said indebtedness was N966,257,551.41, being the principal sum and accrued interest calculated at the rate of 16% i.e., the prime lending rate as contained in the PPA as 4% and the LPR as at 2014 of 12%. The matter came up on the 15th of December 2020 for mention. The matter was adjourned till 11 March 2021.

**(vii) Reclassification of N2 billion borrowed from capital fund to deposit for shares**

On 17 September 2020, the Board of Directors of the Company resolved that the N2 billion borrowed from the capital fund, approved by the board on 7 July 2014, for financing the recurrent expenditure, be reclassified and treated as deposit for shares (equity).
